TRANSACTIONS of the

American Electrochemical Society

GENERAL INDEX

Volumes XXI-XL, 1912-1921

PUBLISHED BY

The American Electrochemical Society

AT THE OFFICE OF THE SECRETARY

COLUMBIA UNIVERSITY, NEW YORK CITY

1927

Copyright, 1927, by the American Electrochemical Society.

Prices of Volumes I to XL of the Transactions (excepting Vols. I, II, III, VII, XXIX and XXXI) to non-members, $6.50 per copy; to members, $2.50; to public libraries, colleges, scientific societies and journals, $4.00. Volumes I, II, III, VII, XXIX and XXXI are double above prices. General Index, Volumes I to XX, $3.00; General Index, Volumes XXI to XL, $5.00. Prices are for volumes bound in cloth and include delivery within the postal union.

When the stock of any volume has been reduced to 25 copies (as Vol. III), the sale is limited to those purchasing the given volume as part of a complete set.

Complete sets of Transactions of the Society may be obtained by members at a discount of 25 per cent on above prices, and to non-members at a discount of 10 per cent. Members who have subscribed regularly to the bound volumes may obtain the volumes necessary to complete their sets at 25 per cent reduction on above prices.

WARE BROS. COMPANY, PRINTERS
1330 VINE STREET, PHILA.

VOL. XXI—1912

Boston Meeting, April 18-20, 1912

TABLE OF CONTENTS

PAGE

Portrait of President W. Lash Miller, Ph. D. ..... *Frontispiece*
Proceedings of the Twenty-first General Meeting 1
Annual Report of the Board of Directors 8

PAPERS

Electrical Conduction—W. R. Whitney 19
The Electron Theory—M. W. Franklin 27
The Modern Theory of Electrical Conduction—D. F. Comstock 41
The Conductivity of Solids—E. Weintraub 49
The Electron Theory of Metallic Conduction—O. W. Richardson 69
The Electric Conductivity of Pure Liquids—Stewart J. Lloyd 93
Conduction in Fused Salts—H. M. Goodwin 105
The Electrical Properties of Solutions of Metals in an Electrolytic Solvent—Chas. A. Kraus 119
The Halogen Hydrides as Conducting Solvents—D. McIntosh 121
The Electrical Conductance of Concentrated Aqueous Solutions of Electrolytes—Edward W. Washburn 125
A General Law of Ionization for Solutions of Binary Electrolytes—William C. Bray 143
Electrical Emission from Heated Salts—C. J. Davisson 155
Electrical Conductivity of Gases—P. G. Nutting 169
Gaseous Ions and Chemical Activity—S. C. Lind 177
The Oil-Drop Method of Studying Electrical Phenomena in Gases—R. A. Millikan 185
Discussion on Electrical Conduction 201
The Influence of Diffusion on Electromotive Force Produced in Solutions by Centrifugal Action—W. Lash Miller 209
Potential Differences at the Junction of Immiscible Phases—Reinhard Beutner 219
Electrical Endosmose—Wilder D. Bancroft 233

PAGE
Smee's Theory of Electrolytic Deposits—Wilder D. Bancroft.....239
A Rotating Cathode—C. W. Bennett 245
Tensile Strength of Electrolytic Copper on a Rotating Cathode—C. W. Bennett 253
Standard Methods Recommended for Testing of Dry Cells—A Report of Progress by the Committee on Dry Cell Tests.....275
Performance of Dry Cells—C. Hambuechen 297
The Regeneration of Sulfated Storage Cells—C. W. Bennett and D. S. Cole 303
The Effect of Addition Substances in Lead Plating Baths—F. C. Mathers and O. R. Overman 313
The Effect of Various Substances on the Rate of Corrosion of Iron by Sulfuric Acid—O. P. Watts 337
The Electrolytic Method for the Reduction of Blue Powder—W. F. Bleeker 359
High Tension Equipment for Electrochemical Plants—J. R. Wilson....371
Power Supply to Electric Furnaces for Refining Iron and Steel—W. Sykes 383
Furnace Electrodes Practically Considered—R. Turnbull 397
Gas Circulation in Electrical Reduction Furnaces—J. W. Richards.....403
Further Development of Electrical Furnaces for Heating Bars and Billets—T. F. Baily 419
Temperature Measurements on the Silicon Carbide Furnace—L. E. Saunders 425
Vacuum Furnace Metallurgy—C. J. Fink 445
The Boltwood Standard of Radioactivity—M. Randall 463
Uniformity and Simplicity in Electrochemical and Electro-Thermal Calculations—C. Hering 499
Effects of the Variations of Thermal Resistivities with the Temperatures—C. Hering 511
Experiments on Heat Insulation—F. A. J. FitzGerald 535
The Thermal Resistivity of Insulating Materials—C. P. Randolph.....545
The Volatility of Zinc Oxide—O. L. Kowalke 557
The Nature of Zinc Cementizing (Sherardizing)—A. R. Johnson and W. R. Woolrich 561

VOL. XXII—1912

New York City Meeting, September 7-10, 1912

TABLE OF CONTENTS

PAGE
Portrait of Dr. Wm. H. Nichols, President of the Eighth International Congress of Applied Chemistry.....*Frontispiece*
Proceedings of the Twenty-second General Meeting..... 1

PAPERS PAGE

Fixation of Nitrogen by Alumina and Carbon—S. A. Tucker and H. L. Read 57
The Action of Nitrogen on Strontium Carbide—S. A. Tucker and Y. T. Wang 67
Study of a Small Carborundum Furnace—W. D. Bancroft, L. V. Walker and C. F. Miller 73
The Electrical Resistivity of Fire-Bricks at High Temperature—A. Stansfield, D. L. McLeod and J. W. McMahon..... 89
Melting Points of Fire Bricks—C. W. Kanolt 95
Heat Losses in Furnaces—F. A. J. FitzGerald 111
Electric Induction and Resistance Furnaces for Steel—C. H. Vom Baur.117
Electric Heating and the Removal of Phosphorus from Iron—A. E. Greene 123
The Function of Slag in Electric Steel Refining—R. Amberg.....133
The Determination of Oxygen in Iron and Steel by Reduction in an Electric Vacuum Furnace—Wm. H. Walker and W. A. Patrick.149
Mill Scale as a Cause of the Pitting of Steel Pipes—G. C. Whipple and M. C. Whipple 159
An Electrolytic Method for the Prevention of Corrosion of Iron and Steel—J. K. Clement and L. V. Walker 193
The Influence of Cinders on the Corrosion of Iron Imbedded in Clay—W. B. Schulte 209
The Rate of Rusting of Iron and Steel—J. Aston and C. F. Burgess...219
Influence of Various Elements on the Corrodibility of Iron—C. F. Burgess and J. Aston 241
A Method for Testing the Mutual Corrosive Effect of Metals—H. H. Hanson and W. K. Lewis 259
The Electro-Analysis of Copper, Antimony, Bismuth and Tin with Acidified Chloride Electrolytes—E. P. Schoch and D. J. Brown.265
The Co-precipitation of Copper and Carbon by Electrolysis—E. B. Spear, C. Chow and A. L. Chesley 277
The Function of Inorganic Addition Agents in the Electrolytic Deposition of Copper—E. B. Spear 281
Blue Gelatine-Copper—W. D. Bancroft and T. R. Briggs 287
The Sulfatizing Roasting Copper Ores and Concentrates—U. Wedge—293
On the Electrolytic Refining of Silver-Bismuth Alloys—W. N. Lacey..301
Mineral Electrodes—R. C. Wells 313
The Vapor Pressure of Zinc Amalgams—J. H. Hildebrand.....319
The Relation Between the Potential of Liquid Amalgam Cells and the Constitution of the Amalgam—J. H. Hildebrand 335
The Electrochemical Behavior of Very Concentrated Thallium Amalgams—T. W. Richards and F. Daniels 343
The Inclusions in Electrolytic Silver and their Effect on the Electrochemical Equivalent of Silver—J. S. Laird and G. A. Hulett....345
Studies on the Silver Coulometer—G. D. Buckner and G. A. Hulett...367

PAGE
The Electrochemical Equivalent of Cadmium—J. S. Laird and G. A. Hulett 385
The Iodine Coulometer and the Value of the Faraday—E. W. Washburn and S. J. Bates 397
Bi-Calcic Phosphate Produced by Electrolytic Acid and Alkali—W. Palmaer 435
Recent Progress in the Electrolysis of Alkaline Salts—M. Wilderman.445
Some Factors in the Cost of Sodium Hypochlorite Production—W. H. Walker and R. Gegenheimer 455
Physical and Chemical Data on Dry Cells and Dry Cell Material—C. Hambuechen and O. E. Ruhoff 467
The Synthesis of Hydrocarbons at High Temperatures and Pressures—J. N. Pring and D. M. Fairlie 473
Electrical Precipitation of Suspended Particles—L. Bradley.....489
Applications of Ductile Tungsten—C. G. Fink 499

VOL. XXIII—1913

Atlantic City Meeting, April 3-5, 1913

TABLE OF CONTENTS

PAGE
Portrait of President, E. F. Roeber, Ph. D. .....*Frontispiece*
Proceedings of the Twenty-third General Meeting 1
Annual Report of the Board of Directors 5

PAPERS

The Electrodeposition of Metals—W. L. Miller 17
The Electrodeposition of Gold and Silver—F. C. Frary 25
The Electrodeposition of Cobalt and Nickel—O. P. Watts 99
The Electrodeposition of Lead—F. C. Mathers 153
The Electrodeposition of Tin—E. F. Kern 193
The Electrodeposition of Copper—C. W. Bennett 233
The Electrodeposition of Brass and Bronze—C. W. Bennett 251
Discussion on the Electrodeposition of Metals 261
Conduction and Radiation of Heat—I. Langmuir 299
Experiments with Furnace Electrodes—F. A. J. FitzGerald and A. T. Hinckley 333
Aluminum Nitride—J. W. Richards 351
Some Tests of the Edison Storage Battery—C. W. Bennett and H. N. Gilbert 359
Concentration Changes in Copper Sulfate Electrolysis—C. W. Bennett and C. O. Brown 383
Water-Immiscible Organic Liquids as Central Conductors in Galvanic Cells—R. Beutner 401
Hyperbasis—F. B. Kenrick 421

VOL. XXIV—1913

Denver Meeting, September 9-11, 1913

Proceedings of the Twenty-fourth General Meeting 1

PAPERS

Flow of Heat through Furnace Walls; The Shape Factor—I. Langmuir, E. Q. Adams and G. S. Meikle 53
Some Aspects of Heat Flow—E. F. Northrup 85
The Heat Resistivity of Carbon and Graphite—J. W. Richards 109
Possible Applications of the Electric Furnace to Western Metallurgy —D. A. Lyon and R. M. Keeney 119
Electric Smelting of Chromium, Tungsten, Molybdenum and Vanadium Ores—R. M. Keeney 167
The Art of Electric Zinc Smelting—W. McA. Johnson 191
The Electric Zinc Furnace—P. E. Peterson 215
The Electrolysis of Cyanide Solutions—E. F. Kern 241
The Electrolysis of Cyanide Solutions of the Simple Alkaline Cyanides —G. H. Clevenger and M. L. Hall 271
Simultaneous Determination of Copper and Lead with the Rotating Anode—A. J. White 297
Rapid Refining of Copper with a Rotating Cathode—C. W. Bennett and C. O. Brown 307
Solid, Thick Deposits of Lead from Lead Acetate Solutions—F. C. Mathers 315
Effect of Light on Decomposition Voltage—A. Leighton 331
The Transformation of Radiant Into Chemical Energy—S. C. Lind ...339
Progress in Electrostatic Ore Dressing—F. S. MacGregor 351
The Carnotite Industry—S. Fischer 361
Some Observations on Base Metal Thermocouples—O. L. Kowalke ...377
Osmium-Platinum—A New Alloy—F. Zimmerman.....391

VOL. XXV—1914

New York City Meeting, April 16-18, 1914

TABLE OF CONTENTS

PAGE
Portrait of F. Austin Lidbury .....*Frontispiece*
Proceedings of the Twenty-fifth General Meeting 1
Annual Report of the Board of Directors 4

PAPERS

PAGE
Some Economic and Aesthetic Aspects of Electrochemistry—E. F. Roeber 17
Characteristics of Electrical Energy as Affecting Chemical Industries—C. P. Steinmetz 29
Notes on Power Transmission and Transmission Economics—P. W. Sotham 43
Some Economies in the Use of Energy in Electric Furnaces—F. A. J. FitzGerald 53
Power in Electric Furnace Work—W. S. Horry 59
The Power Problem in the Electrolytic Deposition of Metals—L. Addicks 65
The Power Problem in the Electrolytic Deposition of Metals—H. E. Longwell 73
Sources of Direct Current for Electrochemical Processes—F. D. Newbury 85
Electric Furnace Current Regulators—R. Turnbull 97
General Discussion on Power Problems in Electrochemistry 107
Electrolytic Flames—W. D. Bancroft and H. B. Weiser 121
Electric Steel Castings—C. A. Hansen 133
Electric Furnaces for Steel Making—E. B. Clark 139
Improvements in the Metallurgy of Zinc—G. C. Stone.....161
Electric Zinc Smelting—W. R. Ingalls 169
Advantages of Southeastern Alaska for Hydro-Electrochemical Industries—W. P. Lass 179
Leaching and Electrolytic Treatment of Copper Ores at Chuquicamata, Chile—E. A. C. Smith 193
The Hydroelectric Treatment of Copper Ores—R. R. Goodrich 207
Leaching of Copper Tailings—R. Gahl 243
Metal Inventory in an Electrolytic Copper Refinery—R. W. Deacon....255
The Electrolytic Deposition of Zinc—J. W. Richards 281
Addition Agents in the Deposition of Zinc from Zinc Sulfate Solution—O. P. Watts and A. C. Shape 291
Electrodeposition of Cadmium, I—F. C. Mathers and H. M. Marble...297
Electrodeposition of Cadmium, II—F. C. Mathers and H. M. Marble..319
Electrodeposition of Nickel—C. W. Bennett, H. C. Kenny and R. P. Dugliss 335
Electrolytic Deposition of Brass on the Rotating Cathode—C. W. Bennett and A. W. Davison 347
A New Method for the Determination of Free Cyanide in Electroplating Solutions—G. E. F. Lundell 369

PAGE
Electrical Conduction at High Temperatures and Its Measurement—E. F. Northrup 373
Laboratory Notes on Some Electrical Properties of Silver Sulfide—F. A. J. FitzGerald 393
Polarization Single Potentials—C. N. Hitchcock 415
New Cell Arrangement for Direct Determination of the "Free Energy"—R. Beutner 441
A Railway Track Cell—E. L. Marshall 467
Experiments on White Lead—R. S. Owens 477
A Microscopic Study of Electrolytic Iron—O. W. Storey 489
The Effect of Addition Agents in the Electrodeposition of Iron—O. P. Watts and M. H. Li 529

VOL. XXVI—1914

Niagara Falls Meeting, October 1-3, 1914

TABLE OF CONTENTS

PAGE
Photograph Twenty-sixth General Meeting .....*Frontispiece*
Proceedings of Twenty-sixth General Meeting 1

PAPERS

The Sources of Impurities in Cathode Copper—Lawrence Addicks.... 51
On the Formation of Badly Conducting Film on Copper Anodes in Copper Cyanide Solutions—W. Lash Miller 63
The Reproducibility of the Copper Electrode—F. H. Getman..... 67
The Electrolytic Determination of Nickel—W. J. Marsh..... 79
On Electrometric Titrations—Henry Ziegel 91
Electrodeposition of Lead from Lead Acetate Solutions—F. C. Mathers. 99
Electrodeposition of Lead from Lead Lactate and Lead Formate Solutions—F. C. Mathers and B. W. Cockrum 117
Electrodeposition of Tin from Tin Salts of Mineral Acids—F. C. Mathers and B. W. Cockrum 133
The Electrolytic Insulation of Aluminum Wire—C. E. Skinner and L. W. Chubb 137
Electro-Percussive Welding—C. E. Skinner and L. W. Chubb.....149
Some Experiments on the Quantitative Determination of Radium—Herman Schlundt 163
Silicidized Carbon—Silfrax—F. J. Tone 181
The Constancy of Base Metal Thermocouples as Related to the Microstructure—O. L. Kowalke 199
The Evaporator and the Power Problem in Electrochemical Plants—Otto Mantius 215
Symposium on the Practical Side of Electrochemical Investigation....227

VOL. XXVII—1915

Atlantic City Meeting, April 22 and 23, 1915
Philadelphia Meeting, April 24, 1915

Proceedings of Twenty-seventh General Meeting 1
Annual Report of the Board of Directors 4

PAPERS

The American Electrochemical Society in its External Relations—Presidential Address by F. A. Lidbury 15
The Development of Electro-analysis in America—Edgar F. Smith.... 23
Some Problems in Copper Leaching—A General Discussion..... 35
Electroplating with Cobalt—H. T. Kalmus, C. H. Harper and W. L. Savell 75
Electrodeposition of Smooth, Solid Lead from Lead Nitrate Solutions—F. C. Mathers and Asa McKinney 131
Cleaning and Plating in the Same Solution—O. P. Watts.....141
Depolarization in LeClanché Cells—M. DeK. Thompson and E. C. Crocker 155
Neutralization of Adsorbed Ions—W. D. Bancroft 175
The Coagulation of Albumin by Electrolytes—W. D. Bancroft.....195
Formation of Magnesium Sub-oxide in the Electrolytic Preparation of Magnesium—F. C. Frary and H. C. Berman.....209
The Temperature of Reaction Between Acheson Graphite and Magnesia—O. L. Kowalke and D. S. Grenfell 221
Thermo-Electromotive Force of Certain Iron Alloys—T. S. Fuller....241
Calorizing Metals—W. E. Ruder 253
"Fibrox"—E. Weintraub 267
The Thermal Conductivity of Refractories—Boyd Dudley, Jr.....285
Fixation of Atmospheric Nitrogen—Leland L. Summers.....339
The Cyanamid Process—Frank S. Washburn 385
Commercial Nitrogen Fixation: A Polemical Note—S. Peacock.....409
An Illuminating Engineer's Conception of an Ideal Light—Herbert E. Ives 419
Chemistry in the Development and Operation of Flaming Arc Carbons—William C. Moore 435
Lighting of Electrolytic Tank Rooms—R. E. Harrington 459

VOL. XXVIII—1915

San Francisco Meeting, September 16-18, 1915

TABLE OF CONTENTS

PAGE

San Francisco Commemorative Medal .....*Frontispiece*
Proceedings of the Twenty-eighth General Meeting 1

PAPERS

Roasting and Leaching Concentrator Slimes Tailings—L. Addicks..... 57
Electrolysis of Copper Sulfate Liquors Using Carbon Anodes—L. Addicks 73
Solution Stratification as an Aid to the Purification of Electrolytes—F. R. Pyne 111
Treatment of Silver Furnace Fume by the Cottrell Process—C. H. Aldrich 119
Electrometallurgical Industries as Possible Consumers of Electric Power—D. A. Lyon and R. M. Keeney 139
Electrochemical Possibilities of the Pacific Coast—J. W. Beckman....169
Heat Losses from an Electric Furnace—W. H. Wills, Jr., and A. H. Schuyler 207
Electric Steel Costs—F. T. Snyder 221
Electric Furnace Melting of Ferro-Alloys—R. S. Wile.....239
The Thermal Insulation of High Temperature Equipment—P. A. Boeck.247
The Electrolytic Precipitation of Gold, Silver and Copper from Cyanide Solutions—G. H. Clevenger 263
Single Potentials in the Silver Cyanide Plating Bath, as Affected by its Composition and Concentration—F. C. Frary and R. E. Porter..307
Electrolytic Antimony Refining—A. G. Betts 325
Electrodeposition of Nickel—C. W. Bennett, C. C. Rose and L. G. Tinkler 339
Electrochemical Synthesis of Phenylhydroxylamine—F. M. Frederiksen.345
The Peptonization of Chromic Oxide—W. D. Bancroft.....351
Electromotive Forces—W. D. Bancroft 357
Use of the Flame Arc in Paint and Dye Testing—W. R. Mott 371
Overhead Electrolysis of Porcelain Insulators (Abstract)—S. L. Foster.401
Radiography of Metals—W. P. Davey 407
The Collection of Radium Emanation and its Preparation for Therapeutic Use—R. S. Bosworth 419

VOL. XXIX—1916

Washington, D. C., Meeting, April 27-29, 1916

TABLE OF CONTENTS

PAGE

Portrait of President F. A. J. FitzGerald .....*Frontispiece*
Proceedings of the Twenty-ninth General Meeting 1

PAPERS PAGE

The Modern Engineer—Presidential Address by Lawrence Addicks... 21
A Symposium upon Co-operation in Industrial Research—Lawrence Addicks, F. A. Lidbury, W. D. Bancroft, W. H. Walker, D. A. Lyon, L. H. Baekeland and W. R. Whitney..... 25
A Symposium on Niagara Falls Power and American Industries—I. R. Edmands, F. J. Tone, A. H. Hooker and W. S. Landis..... 59
Power Development-Reclamation Service Projects—Lecture by A. P. Davis 99
The Necessity for Water Power Development—Lecture by Henry J. Pierce 107
The Relation Between Contact Potentials and Electrochemical Action—Irving Langmuir 125
Contact Resistance of Metal Electrodes—N. K. Chaney 183
Electrode Surface Phenomena—Wm. C. Arsem 207
The Passive State of Metals—C. W. Bennett and W. S. Burnham.....217
Overvoltage—C. W. Bennett and J. G. Thompson 269
Overvoltage and Monatomic Hydrogen—W. D. Bancroft.....301
Depolarization by Electrical Waves—W. D. Bancroft.....309
Polarization in Le Clanché Cells—Duncan A. MacInnes.....315
Electrolytic Formation of Perchlorate—C. W. Bennett and E. L. Mack.323
Electrolytic Zinc—W. R. Ingalls 347
Review of Recent Progress in Electrolytic Iron—Oliver W. Storey....357
Some Unsolved Problems of the Electro-Plater—Geo. B. Hogaboom..369
Nickel Plating—F. C. Mathers, E. H. Stuart and E. G. Sturdevant....383
Rapid Nickel Plating—O. P. Watts 395
Tests of Tin Plating Baths—F. C. Mathers and B. W. Cockrum.....405
Peptone as an Addition Agent in Stannous Ammonium Oxalate Baths—F. C. Mathers and B. W. Cockrum 411
Addition Agents in the Electro-deposition of Silver from Silver Nitrate Solutions—F. C. Mathers and J. R. Kuebler.....417
Corrosion and the Engineer—W. H. Walker 433
The Effect of Rust upon the Corrosion of Iron and Steel—James Aston.449
The Influence of Frequency of Reversal of Current on Electrolytic Corrosion—Burton McCollum and G. H. Ahlborn.....469
Some Faults of the Small Electric-Arc Furnace for Melting and Refining Steel—W. M. McKnight 493
The Rennerfelt Electric Arc Furnace—C. H. Vom Baur 497
The Brittleness of Annealed Copper—W. E. Ruder 515
Magnesium—Wm. M. Grosvenor 521
Liquid Chlorine—G. Ornstein 529
Hydrogen for Military Purposes—E. D. Ardery 549
Cobalt as an Element for Thermo-Couples—O. L. Kowalke.....561
The Electrical Resistances and Temperature Coefficients of Nickel-Copper-Chromium and of Nickel-Copper-Manganese Alloys—F. M. Sebast and G. L. Gray 569

PAGE
Detectors in Wireless Telegraphy—W. D. Bancroft 579
Unstable States in Arc and Glow—W. G. Cady.....593
The Electric Arc in Vapors and Gases at Reduced Pressures—W. A. Darrah 613
New Form of Color-matching Lamp—McFarlan Moore 639

VOL. XXX—1916

New York City Meeting, September 27-30, 1916

TABLE OF CONTENTS

PAGE
Proceedings of the Thirtieth General Meeting 1

PAPERS

Made in America, A Symposium Arranged and Conducted by Mr. L. E. Saunders 63
The Electrodeposition of Nickel—L. D. Hammond.....103
Current Efficiencies in Nickel Plating Baths with Rotating Cathodes—F. C. Mathers and E. G. Sturdevant 135
The Protection of Iron by Electroplating—O. P. Watts and P. L. DeVerter 145
Preliminary Studies in the Deposition of Copper in Electrotyping Baths—W. Blum, H. D. Holler and H. S. Rawdon.....159
Contributions to the Knowledge of the Electrolysis of Aqueous Solutions of Vanadium Salts—Siegfried Fischer, Jr.....175
Electrolytic Zinc Dust—H. J. Morgan and O. C. Ralston 229
The Electrolytic Recovery of Lead from Brine Leaches—C. E. Sims and O. C. Ralston 241
Characteristics of Small Dry Cells—C. F. Burgess 257
Effect of Temperature upon the Performance of the Edison Storage Battery—L. C. Turnock 273
The Equilibrium Between Bromine and Potassium Bromide Solutions at 0°—Grinnell Jones and M. L. Hartmann.....295
A New Method for the Study of Silver Peroxynitrate—M. J. Brown..327
High Temperature Heat Developed During Electrolysis—Carl Hering.347
The Possibilities of Developing Super-Refractory Materials for Incandescent Lighting—F. A. Fahrenwald 357
Comparison of the Ionization Currents Due to Equal Quantities of Radium Emanation in Different Types of Electroscopes—T. H. Leaming, Herman Schlundt and J. Underwood.....365
Observations upon the Atmospheric Corrosion of Commercial Sheet Iron—E. A. Richardson and L. T. Richardson.....379

VOL. XXXI—1917

Detroit Meeting, May 2-5, 1917

TABLE OF CONTENTS

PAGE

Portrait of President Colin G. Fink.....*Frontispiece*
Proceedings of the Thirty-first General Meeting..... 1

PAPERS

Presidential Address—F. A. J. FitzGerald 37
Comments on the Electric Steel Industry—J. A. Mathews..... 43
Notes on Electric Steel Melting—J. L. Dixon..... 53
The Electric Furnace in the Steel Casting Plant—R. F. Flinterman.... 69
The Bethlehem 10-ton Girod Steel Furnace—C. A. Buck 81
Rennerfelt Electric Furnace Operation—C. H. Vom Baur..... 87
Electrical Characteristics of Electric Furnaces—A. A. Meyer..... 97
Low Temperature Electro-Thermal Processes—C. F. Hirshfeld.....131
A Switchboard for Experimental Electric Furnace Work—W. L. Badger 157
The Grinding Wheel—A Connecting Link Between the Electric Furnace and the Automobile—R. G. Williams 165
The Electrolytic Pickling of Steel—M. DeKay Thompson and O. L. Mahlman 181
The Corrosion of Cast Iron and Its Bearing upon the Electrolytic Theory of Corrosion—E. A. Richardson and L. T. Richardson..191
Acid-Resisting Properties of Some Iron-Silicon Alloys—O. L. Kowalke.205
The Production and Properties of Magnetite Electrodes—M. DeKay Thompson and T. C. Atchison 213
The Electrolytic Behavior of Tungsten—W. E. Koerner.....221
Electrical Endosmose and Adsorption—T. R. Briggs, H. L. Pierson and H. S. Bennett 257
Essential Oils as Addition Agents in Plating Baths—F. C. Mathers and A. B. Leible 271
Addition Agents in the Electro-deposition of Silver from Uncommon Silver Salts—F. C. Mathers and T. G. Blue.....285
Tests of Antimony Plating Baths—F. C. Mathers and K. S. Means...289
Electro-deposition of Antimony from Fluoride Baths Containing Addition Agents—F. C. Mathers, K. S. Means and B. F. Richard....293
The Evolution of Hydrogen from Cyanide Plating Solutions—O. P. Watts and A. Brann 303
Automobile Storage Batteries—W. C. Brooks.....311
The Current Efficiency in Charging the Edison Storage Battery—M. DeKay Thompson and L. R. Byrne.....339
A Cuprous Oxide Photo-chemical Cell—T. W. Case.....351
Chemistry of the Flaming Arc in Relation to Luminescence—W. R. Mott 365

PAGE
The Vosmaer Phenomenon—W. C. Moore.....391
The History and Legal Phases of the Smoke Problem—Ligon Johnson.397
Some Theoretical Aspects of Electrical Fume Precipitation—W. W. Strong 415

VOL. XXXII—1917

Pittsburgh Meeting, October 3-6, 1917

TABLE OF CONTENTS PAGE

Portrait of Dr. E. F. Roeber.....*Frontispiece*
Proceedings of the Thirty-second General Meeting..... 1

PAPERS

The Production of Electricity by Steam Power—Alex Dow..... 65
Shawinigan and its Electrochemical Industries—H. E. Randall..... 87
The Substation Problem of the Electrochemical Plant—J. L. McK. Yardley 99
Electric Pig Iron in War Times—Robert Turnbull.....119
The Electric Furnace in the Development of the Norwegian Iron Industry—Haakon Styri 129
A Resistance Furnace—Frank Thornton, Jr. 141
Resistance Type Furnace for Melting Brass—T. F. Baily.....155
Preparation of Pure Alloys for Magnetic Purposes—T. D. Yensen....165
A Method for the Commercial Analysis of Ferro-Silicon—R. E. Lowe..185
Influence of Temperature of Measurement on the Electrical Resistivity and Thermo-Electromotive Potential of Solutes in Steels—E. D. Campbell 193
Calorized Iron as an Element for Thermocouples—O. L. Kowalke.....215
Copper Castings for Electrical Purposes—G. F. Comstock.....221
Electrolytic Recovery of Copper and Sulfuric Acid from Copper Mill Pickling Solutions—J. L. Jones.....229
Electrolytic Pickling Process and its Effect on the Physical Properties of Iron and Steel—John Coulson.....237
The Prevention of Brittleness in Electroplated Steel Springs—T. S. Fuller 247
The Corrosion of Metals by Acids—O. P. Watts and N. D. Whipple..257
The Corrosion of Fence Wire—O. W. Storey.....285
Electrolytic Zinc Extraction at Trail, B. C.—E. H. Hamilton.....317
The Future of Electrolytic Zinc—Thomas French 321
An Improved Electro-Analysis Apparatus—J. L. Jones.....329
The Spectroscopic Determination of Small Amounts of Lead in Copper—C. W. Hill and G. P. Luckey 335
Synthetic Gasoline by Electrochemical Means—L. B. Cherry.....345
Chlorine as a War Factor—Wm. D. Marshall 373

PAGE
The Application of Radium in Warfare—C. H. Viol and G. D. Kammer.381
Silver Peroxide and the Valence of Silver—H. C. P. Weber.....391
Effect of Lithium upon the Capacity of the Edison Storage Battery—
L. C. Turnock 405
Suggested Reforms in Some Chemical Terms—Carl Hering.....415
The Poisoning of Catalytic Agents—W. D. Bancroft.....439
Fractional Combustion—W. D. Bancroft 465
Theory of Contact Catalysis—W. D. Bancroft 475

VOL. XXXIII—1918

Appalachian South Meeting, April 28-May 5, 1918

Portrait of President F. J. Tone.....*Frontispiece*
Proceedings of the Thirty-third General Meeting..... 1

PAPERS

Electrochemistry and National Economy—Colin G. Fink..... 47
The Part the United States Industries Must Perform to Enable the
Allies to Win the War—C. G. Schluederberg..... 53
The Chemical, Electrochemical and Metallurgical Resources of the
Chattanooga District—T. P. Maynard 63
The Coal and Iron Resources of the Chattanooga District—E. M. Jones. 69
The Mineral Resources of Alabama—Eugene A. Smith 73
The Sign of the Zinc Electrode—W. D. Bancroft 79
An Experimental Carbon Cell—S. A. Reed..... 89
The Calculation of Storage Battery Capacities—C. W. Hazelett..... 95
The Electrolytic Behavior of Manganese in Sulfate Solution—G. D.
Van Arsdale and C. G. Maier 109
The Effect of Iron Sulfate in the Electrolytic Precipitation of Copper
from Sulfate Solution with Insoluble Lead Anodes—E. F. Kern..131
Experiments with the Copper Cyanide Plating Bath—F. C. Mathers...147
Electrolytic Refining of Tin—E. F. Kern 155
Brittleness Produced in Steel Springs by Electroplating—O. P. Watts
and C. T. Fleckenstein 169
Why Busy Rails Do Not Rust—O. P. Watts.....173
Thermo-electric Force of Some Alloys—M. A. Hunter and J. W. Bacon.183
A Precision Method for the Determination of Gases in Metals—H. M.
Ryder 197
The Electrical Resistivity of Porcelain and Magnesia at High Tem-
peratures—P. H. Brace 205
Crushing Strength of Magnesia-Silica Mixtures at High Temperatures—
O. L. Kowalke and O. A. Hougen 215
Methods for the Commercial Analysis of Ferrosilicon—Earl M. Anger.225

PAGE
The Vom Baur Arc Furnace—C. H. Vom Baur 237
The Booth-Hall Electric Furnace—W. K. Booth 247
Electric Steel Castings—R. F. Flinterman 263
Certain Hydroelectric Power Possibilities in the Provinces of Quebec and Ontario, Canada—Louis Simpson 273
The Larger Undeveloped Water Powers of Tennessee—J. A. Switzer..279

VOL. XXXIV—1918

Atlantic City Meeting, September 30-October 2, 1918

Proceedings of the Thirty-fourth General Meeting..... 1

PAPERS

The Government and the Technical Man After the War—F. A. Lidbury. 67
Research After the War—W. D. Bancroft 75
Tariff Problems in the Electrochemical Industries—Grinnell Jones.... 81
The Power Situation After the War—C. A. Winder 87
Surplus Electric Power After the War—J. W. Beckman..... 97
The War and the Nitrogen Industry—W. S. Landis.....105
The Electric Furnace After the War—F. A. J. FitzGerald 121
The Future of Electric Steel—J. A. Mathews 131
Electric Pig Iron After the War—Robert Turnbull 143
The Future of Electrolytic Chlorine—A. H. Hooker.....149
Commercial Uses of Chlorine—Van R. Kokatnur 155
Military Application of Electroplating—Wm. Blum 169
Processes Within the Electrode Which Accompany the Discharge of Hydrogen and Oxygen—D. P. Smith 177
The Sign of Potentials—O. P. Watts 189
An Apparatus for the Separation of Radium Emanation and Its Determination Electroscopically—J. E. Underwood and Herman Schlundt 203
Notes on the Heterogeneous Equilibrium of Hydrogen and Oxygen Mixed with Radium Emanation—S. C. Lind 211
Nitrogen Fixation Furnaces—E. Kilburn Scott 221
Relative Volatilities of Refractory Materials—W. R. Mott.....255
Discharge Characteristics of a Certain Make of Dry Cell—C. A. Gillingham 297
Hardness of Soft Iron and Copper Compared—F. C. Kelley.....325

VOL. XXXV—1919

New York City Meeting, April 3-5, 1919

TABLE OF CONTENTS

PAGE

Portraits of Honorary Members ..... *Frontispiece*
Proceedings of the Thirty-fifth General Meeting..... 1
Report of Committee of New Patent Legislation 8

PAPERS

Electrochemistry in its Human Relations—F. J. Tone..... 31
Government Ownership of Water Powers and Electrochemical Industry Report 39
Government Ownership of Water Powers and Electrochemical Industry—F. A. J. FitzGerald 41
Power Production for Electrochemical Purposes—C. S. Cook..... 63
Principles of Inductive Heating With High Frequency Currents—E. F. Northrup 69
The Electric Furnace: Its Introduction into Foundry Practice— W. E. Moore 161
Improving the Quality of Gray Iron by the Electric Furnace—George K. Elliott 175
Direct Production of "White Arsenic"—Charles A. Doremus.....187
Uranium: Its Extraction from Pitchblende—Gustave Gin 191
Notes on Electrostatic Precipitation—H. D. Braley 199
The Nelson Electrolytic Chlorin Cell—C. F. Carrier, Jr.....239
Electrolytic Silver and Gold Refining at Perth Amboy, N. J.—George C. Griswold 251
A Process for Electrolytically Refining Nickel—Geo. A. Guess.....259
Electroplating on Iron from Copper Sulfate Solution—Oliver P. Watts 265
Remarkable Pitting of Electroplating—Oliver P. Watts.....279
The Oxidation of Ammonia—W. S. Landis 283
Silicon Tetrachloride—Otis Hutchins 309
The Role Played by Silicon and Titanium Tetrachlorides During the Past War—G. A. Richter 323
The Preparation of Fluorine—W. L. Argo, F. C. Mathers, B. Humiston and C. O. Anderson 335
Chemical War Secrets and Releasing Manufacturers' Rights—Edward Gudeman 351
Portable Electrical Filter for Smokes and Bacteria—Arthur B. Lamb, G. L. Wendt and Robert E. Wilson 357
An Electrolytic Process for the Production of Sodium Permanganate from Ferromanganese—Robert E. Wilson and W. Grenville Horsch 371
Lead Plating of Shell Interiors and Boosters—A. G. Reeve.....389

PAGE
The Production of Silicon-Manganese in Electric Furnaces—B. G. Klugh 401
Electric Furnaces of the Resistance Type Used in the Production of Essential War Materials—T. F. Baily 411

VOL. XXXVI—1919

Chicago Meeting, September 23-26, 1919

TABLE OF CONTENTS

Proceedings of the Thirty-sixth General Meeting 1
Final Report of the Committee on the Algebraic Signs of Potentials... 3
Appendix to the Final Report of the Committee on the Algebraic Signs of Potentials 4

PAPERS

The Activation of Carbon—N. K. Chaney 91
The Penetration of Iron by Hydrogen—T. S. Fuller 113
Some Problems in Contact Catalysis—W. D. Bancroft.....139
Further Problems in Contact Catalysis—H. S. Taylor.....149
The Thermal Problem in Organic Contact Catalysis—W. J. Huff.....167
The Thermal Problem in Contact Sulfuric Acid Manufacture—F. C. Zeisberg 187
Reactivity and Adsorption in Heterogeneous Catalysis—E. K. Rideal..195
Demonstration of Preparation of Fluorine by Prof. F. C. Mathers....207
Factors Governing the Structure of Electro-deposited Metals—William Blum 213
Lead Plating from Fluoborate Solutions—William Blum, F. J. Liscomb, Zalia Jencks and W. E. Bailey 243
Depreciation of Small Dry Cells with Age—A. J. Helfrecht.....269
The Effect of Amalgamation upon the Single Potential of Aluminum—Louis Kahlenberg and J. A. Montgomery 277
The Effect of Amalgamation upon the Single Potentials of the Binary Alloys of Aluminum with Copper, Zinc and Nickel—Louis Kahlenberg and J. A. Montgomery 289
Manganin—M. A. Hunter and J. W. Bacon 323
Commercial Possibilities in the Electrochemical Production of Organic Compounds—C. J. Thatcher 337
Radiant Resistor Furnace—F. A. J. FitzGerald 349
Electric Heat in the Typewriter Industry—A. M. Clark 357
Electric Furnace for Experimental Work—F. A. J. FitzGerald and G. C. Moyer 361
A Square Deal for the Electric Furnace—H. G. Weidenthal.....367

VOL. XXXVII—1920

Boston and Cambridge Meeting, April 8-10, 1920

TABLE OF CONTENTS

Proceedings of the Thirty-seventh General Meeting..... 1

PAPERS

Contact Catalysis—W. D. Bancroft 21
Colloid Chemistry and Electrochemistry—W. D. Bancroft..... 55
"Settling" Problems—W. A. Deane 71
Graphitic Acid—A Colloidal Oxide of Carbon—G. A. Hulett and O. A. Nelson 103
The Problem of Determining Graphitic Carbon—W. A. Selvig and W. C. Ratliff 121
Examples of Selective Adsorption by *B. Pyocyaneus*—W. C. Moore...155
The Söderberg Self-baking Continuous Electrode—J. W. Richards....169
Synthetic Electric Furnace Cast Iron—C. A. Keller.....189
The Reduction of Manganiferous Silicate Slags—E. F. Kern.....207
Step Induction Regulator for Electric Furnaces—P. B. Short.....219
Carbon in Iron—T. D. Yensen 227
Carbon Determination in Ferro-Alloys—C. J. Rottmann 245
The Manufacture of Ferro-Alloys in the Electric Furnace—C. B. Gibson 255
Recent Developments in the Ferro-Alloy Industry—R. J. Anderson....265
The Position of the Electric Furnace in Iron and Steel Metallurgy—L. B. Lindemuth 299
The Manufacture of High-speed Steel in the Electric Furnace—R. C. McKenna 319
Properties of Ferrosilicon—F. A. Raven 329
Development of Ferro-Vanadium Metallurgy—B. D. Saklatwalla.....341
Ferrocerium—Alcan Hirsch 359
Electric Furnace Power from the Standpoint of the Central Station—E. A. Wilcox 365
The Electric-Arc Melting Furnace and the Central Station Electric Company—A. C. Smith 391
Power Problems from the Standpoint of the Furnace Operator—W. G. Berlin 401
The Electric Furnace and the Central Station—H. L. Hess.....413
Power Developments in Scandinavia—J. W. Beckman.....431
Location for a New England Electrochemical Plant—C. T. Maynard..441
Water Powers of the Pacific Coast—F. H. Fowler.....447
The Electrical Production of Alloys—R. M. Major.....457
The Electrolytic Production of Calcium—P. H. Brace 465
Electrolytic Chromium—G. J. Sargent 479
Fundamental Problems in Alloys Research—H. E. Howe 499

PAGE
Stellite—Elwood Haynes 507
Some Electrical Properties of Titanium Alloys—M. A. Hunter and J. W. Bacon 513
Bronze Plating—F. C. Mathers and Stanley Sowder 525
Influence of Enclosed Slag on the Corrosion of Wrought Iron—L. T. Richardson 529
The Embrittling Effects of Cleaning and Pickling upon Carbon Steels—S. C. Langdon and M. A. Grossman 543
The Evolution of the Electric Brass Furnace—H. M. St. John.....579
Hydrogen Ion Concentration in Dry Cells—H. D. Holler and L. M. Ritchie 607
The Effect of an Alternating Current on Hydrogen Overvoltage—H. M. Goodwin and M. Knobel 617
The Reactions of the Lead Accumulator—D. A. McInnes, L. Adler and D. B. Joubert 641
A New Cyanide—W. S. Landis 653
Arc Images in Chemical Analysis—Wm. R. Mott.....665
Physical Characteristics of Specialized Refractories. (Spalling Losses.) —M. L. Hartmann and O. A. Hougen 707
Physical Characteristics of Specialized Refractories. (Comparative Cold and Hot Abrasion Tests.) —M. L. Hartmann and J. F. Kobler 717
The Adsorption of Arsenious Oxide by Metastannic Acid—T. R. Briggs and W. J. Bartlett 723

VOL. XXXVIII—1920

Cleveland Meeting, September 30-October 2, 1920

TABLE OF CONTENTS

Proceedings of the Thirty-eighth General Meeting..... 1

PAPERS

Faraday's Law at the Cathode—J. W. Richards 91
A New Form of Standard Cell—C. J. Rodman and Thos. Spooner.... 97
Industrial Applications of Electrolytic Conductivity Measurements—Earl A. Keeler 113
Lead Plating from Sodium Hydroxide Lead Baths by the Use of Addition Agents—Frank C. Mathers 121
Tin Plating from Alkaline Tin Baths by the Use of Addition Agents—Frank C. Mathers and Wm. H. Bell 135
The Electrolytic Refining of Tin—Edward F. Kern 143
The Electro-deposition of Brass from Cyanide Solutions—Alfred L. Ferguson and Earl G. Sturdevant 167

PAGE
Electrolytic Production of Hydrogen Peroxide—F. W. Skirrow and E. R. Stein 209
The Influence of Copper, Manganese and Chromium and Some of Their Combinations on the Corrosion of Iron and Steel—E. A. Richardson and L. T. Richardson 221
The Solution of Metals in Acids as Related to Corrosion—W. D. Richardson 245
Physical Characteristics of Specialized Refractories—M. L. Hartmann, A. P. Sullivan and D. E. Allen 279
Deterioration of Nickel Resistors—F. A. J. FitzGerald and Grant C. Moyer 301
Some Phenomena Observed in Electric Furnace Arcs—J. Kelleher.....309
Heat Losses Through Electrodes of a Six-ton Heroult Furnace—M. R. Wolfe and V. de Wysocki 317
Heat Content of Steel and Slag from an Electric Furnace—A. M. Kuhlmann and A. D. Spillman 325
Electric Furnace Smelting of Montana Manganese Ores—E. S. Bardwell 333
The Söderberg Electrode: First American Installation—J. W. Richards 351
The Electric Furnace as Applied to Metallurgy—Clarence Jay West...365

VOL. XXXIX—1921

Atlantic City Meeting, April 21-23, 1921

TABLE OF CONTENTS

Proceedings of the Thirty-ninth General Meeting..... 1
Constitution, By-Laws and Sundry Regulations of the Society..... 14

PAPERS

Our Inventory—Walter S. Landis (Presidential Address)..... 31
Rare Gases of the Atmosphere—R. B. Moore (Lecture)..... 39

SYMPOSIUM ON CORROSION

Introduction to Symposium on Corrosion of Iron and Steel—W. H. Walker 53
The Gap Between Theory and Practice in the Production of Corrosion-Resisting Iron and Steel—W. D. Richardson..... 61
Anomalies Encountered in a Study of Immersion Tests of Iron and Steel—Allerton S. Cushman and George W. Coggeshall..... 81
Some Observations on the Mechanism of the Increased Corrosion Resistance of Steel and Iron Due to Small Copper Contents—D. M. Buck 109
Observations on the Corrosion of Iron and Steel—J. A. Aupperle and D. M. Strickland 123

PAGE
Practical Means of Preventing Corrosion of Iron and Steel Where Not Exposed Directly to the Atmosphere—F. N. Speller.....141
The Effect of Copper and Silver Salts on the Corrosion of Iron by Acids—Oliver P. Watts and Harold C. Knapp.....155
The Corrosion of Old Iron—E. A. Richardson and L. T. Richardson..167
The Corrosion of Steel Ranges—Oliver W. Storey.....175
Unusual Boiler Tube Corrosion by Carbon Dioxide—B. G. Worth.....191
Experiments on the Corrosion of Iron and Steel—T. S. Fuller.....199
A Practical Aspect of the Corrosion Problem—John F. Thompson....213
Metal Protective Paints—Henry A. Gardner 223
Some Types of Non-Ferrous Corrosion—H. S. Rawdon.....227
Electrolytic Corrosion of Lead by Continuous and Periodic Currents—E. R. Shepard 239
Principles of Alloying to Resist Corrosion—Oliver P. Watts.....253

Phenomena of Arc Welding—O. H. Eschholz 265
Electric Furnaces for Non-Ferrous Alloys—H. W. Gillett.....293
Electrodynamic Forces in Electric Furnaces—Carl Hering.....313
Recent Progress in High Frequency Inductive Heating—E. F. Northrup.331
The Regulation of Electric Steel Arc Furnaces Using Movable Electrodes—W. G. Mylius 357
Reduction by Means of Silicon—L. Kahlenberg and W. J. Trautmann.377
The Apparent Irreversibility of Calomel Electrode—A. S. Laubengayer.417
A Photo-Electric Effect in Audion Bulbs of the Oxide-Coated Filament Type—T. W. Case 423
Electrochemical Aspects of Photographic Development—S. E. Sheppard.429
The Electrolytic Manufacture of Paraminophenol—A. S. McDaniel, L. Schneider and A. Ballard 441
Some Aspects of Electrolytic Iron—W. A. Noyes, Jr.....451
The Use of Fluorides in Solutions for Nickel Deposition—W. Blum..459
Ductile Electrolytic Nickel—C. P. Madsen 483
A New High Capacity Storage Battery—C. W. Hazelett.....497
Marsh Electrolytic Cells for Chlorine, Caustic Soda and Hydrogen—C. W. Marsh 507

VOL. XL—1921

Lake Placid Club Meeting, September 29-October 1, 1921

TABLE OF CONTENTS

PAGE
Portrait of Dr. Joseph W. Richards.....*Frontispiece*
Proceedings of the Fortieth General Meeting 1
Obituary—Professor Joseph William Richards 4
Discussion on Recent Electrometallurgical Developments in Scandinavia—Joseph W. Richards 8

PAPERS PAGE

Experiences with Alkaline and Alkaline Earth Metals in Connection with Non-Ferrous Alloys—Charles Vickers 15
The Electrolytically-Produced Calcium-Barium-Lead Alloys Comprising Frary Metal—Wm. A. Cowan, L. D. Simpkins and G. O. Hiers 27
Electrolytic Corrosion of Lead-Thallium Alloys—Colin G. Fink and Charles H. Eldridge 51
A New Theory of the Corrosion of Iron—J. Newton Friend..... 63
Rust Prevention by Slushing—Haakon Styri 81
Transformer Oil Sludge—C. J. Rodman 99
Factors Influencing the Electrolysis of Organic Compounds—Raymond Freas 109
Electrolytic Oxidation of the Leuco-Base of Malachite Green—Alexander Lowy and Elmer H. Haux 123
The Electrolytic Dissociation of Cyanamide and Some of its Salts in Aqueous Solutions—N. Kameyama 131
Electrolytic Production of Sodium Perborate—P. Chr. Alsgaard.....139
The Electrolytic Oxidation of Hydrochloric Acid to Perchloric Acid—H. M. Goodwin and E. C. Walker, 3d.....157
Graphic Control of Electrolytic Processes—B. G. Worth.....167
The Effect of Pressure on Overvoltage—H. M. Goodwin and L. A. Wilson 173
Researches on the Electrodeposition of Iron—W. E. Hughes.....185
Electrolytic Solution and Deposition of Copper—T. R. Briggs.....231
Electrometallurgy of Zinc—W. R. Ingalls 245
Studies on the Zinc Cyanide Plating Solution—C. J. Wernlund.....257
The Electrodeposition of Lead-Tin Alloys—W. Blum and H. E. Haring.287
The Structure and Properties of Alternately Electrodeposited Metals—Wm. Blum 307
The Influence of the Electric Furnace on the Metallurgy of Non-Ferrous Metals—H. M. St. John 321
Modern Developments in the British Brass Inudstry—Ernest A. Smith.345
Resistance Type Electric Furnace in the Melting of Brass and Other Non-Ferrous Metals—T. F. Baily 371
Comparison of Electric Furnace Practice with Fuel-Fired Furnace Practice—N. K. B. Patch 383
Electric Silver Melting—H. A. DeFries 389
The Electric Furnace Melting of Nickel Silver—F. C. Thompson.....399
Aluminum-Copper Alloys—Robert J. Anderson 405
Recent Developments in Electric Furnaces of the Muffled Arc Type—H. A. Winne 435
Electric-Furnace Purification of Zirkite—J. G. Thompson.....445
Physical Characteristics of Specialized Refractories—Part IV (Cross Breaking Strength)—M. L. Hartmann and W. A. Koehler.....457
An Electric Steam-Generator for Low Voltage—F. A. Lidbury and F. A. Stamps 467

AUTHOR INDEX

(D) indicates that the reference is to the "Discussion" of a paper.

SUBJECT INDEX

Abrasion, Test for Refractories.....**37**, 718 (1920)
Abrasive Wheel **31**, 165 (1917)
Abrasives, Aluminous, Manufacture of.....**31**, 166 (1917)
Artificial, Manufacture of **31**, 165 (1917)
Grinding Characteristics **31**, 175 (1917)
Niagara Falls, Manufacture at.....**29**, 70 (1916)
Tariff Problems **34**, 83 (1918)
Absorption and Adsorption **27**, 187 (1914)
Accumulator. *See* Storage Battery.
Acetanilide, Iron Electrodeposition, Effect on.....**25**, 531 (1914)
Acetic Acid, Adsorption by *B. pyocyaneus*.....**37**, 160 (1920)
Gold, Corrosion of **32**, 269 (1917)
Iron-Silicon Alloys, Corrosion of.....**31**, 209 (1917); **39**, 75 (1921)
Lead Amalgam, Corrosion of.....**32**, 267 (1917)
Lead, Corrosion of **32**, 267 (1917)
Lead Deposition from Lead Acetate, Effect on.....**24**, 319 (1913)
Silver, Corrosion of **32**, 268 (1917)
Acetylene, Oxidation of Ammonia, Effect on.....**35**, 299 (1919)
Acheson Graphite, Machining **26**, 239 (1914)
Reaction Temperature with Magnesia **27**, 221 (1915)
Acid Egg, Cast Iron, Corrosion of.....**39**, 234 (1921)
Acid Indicator, Dimethylamidoazobenzol as **29**, 379 (1916)
Acids, Metals, Corrosion of, by, ...**32**, 257 (1917)
See also Names of Individual Acids.
"Activated Carbon" **36**, 91 (1919)
Addition Agents, **23**, 265, 270, 293 (1913); **26**, 129, (1914); **27**, 138 (1915)
Antimony Fluoride Plating Bath, Effect on.....**31**, 293 (1917)
Cadmium, Electrodeposition of, Effect on.....**25**, 319 (1914)
Character, Determination of **27**, 138 (1915)
Colloidal, Effect of **27**, 138 (1915)
Colloids and **38**, 127 (1920)
Copper, Electrodeposition of, Effect on (review)..**23**, 244, 265 (1913)
Effect on Voltage **29**, 202 (1916)
Effects of **36**, 232, 261 (1919)
Electroplating, Role in **36**, 232 (1919)
Essential Oils, Use of, as.....**31**, 271 (1917)
Inorganic, Electrodeposition of Copper, Function in...**22**, 281 (1912)
Investigation of **29**, 376 (1916)
Iron, Electrodeposition of, Effect on..**25**, 529 (1914); **29**, 363 (1916)
Lead Deposition from Lead Acetate, Effect on.....**26**, 99 (1914)

ADDITION AGENTS, *Continued*
Lead Deposition from Lead Lactate, Effect on.....**26**, 118 (1914)
Lead Deposition from Lead Nitrate, Effect on.....**27**, 132 (1915)
Lead Deposition, Role in **26**, 99, 117 (1914)
Lead Plating from Sodium Hydroxide Lead Baths...**38**, 121 (1920)
Nickel Plating, Effect on **23**, 147 (1913)
Plating Baths, Clarifying Action on.....**38**, 130 (1920)
Silver, Electrodeposition of, from Silver Nitrate
29, 417 (1916); **31**, 285 (1917)
Theory of **38**, 127 (1920)
Tin **33**, 167 (1918)
Tin, Deposition of, Role in.....**26**, 133 (1914)
Tin, Electrodeposition of, Effect on (review).....**23**, 226 (1918)
Tin Plating Baths, Role in.....**29**, 411 (1916)
Zinc Cyanide Plating Solution, Use in.....**40**, 264 (1921)
Zinc Deposition from Zinc Sulfate Solution, Effect on, **25**, 291 (1914)
ADDUCTION, Definition **32**, 426 (1917)
ADSORBENT. *See* Carbon, Charcoal.
ADSORPTION, Catalysis, Heterogeneous, Role in.....**36**, 195 (1919)
Catalytic Action, Role in **32**, 475 (1917)
Catalytic Poisons and **37**, 28 (1920)
Colloids, Precipitation of, Role in **27**, 195 (1915)
Electrical Endosmose and **31**, 257 (1917)
Passivity, Role in **29**, 236 (1916)
Poisoning by Catalytic Agents, Role in.....**32**, 439 (1917)
Selective, by *Bacillus Pyocyaneus* **37**, 155 (1920)
Specific, Role in Neutralization of Adsorbed Ions.....**27**, 175 (1915)
Types of **36**, 91, 107 (1919)
ADVANCE ALLOY, Cobalt and, in Thermocouples.....**29**, 563 (1916)
Electrical Resistance **29**, 570 (1916)
AICH'S METAL, Composition **40**, 361 (1921)
AIR, Electrical Conductivity **21**, 173 (1912)
Lead Plated Steel, Pitting of, by.....**35**, 279 (1919)
AIR CURRENTS, Convection of Heat, Effect on.....**23**, 323 (1913)
AIR LEAK of Electroscope **21**, 486 (1912)
ALABAMA, Mineral Resources of **33**, 73 (1918)
ALARM, Automatic Fire **25**, 393 (1914)
ALASKA, Hydro-electrochemical Industries, Advantages for, **25**, 179 (1914)
Natural Resources **25**, 179 (1914)
ALBUMIN, Coagulation of, by Electrolytes.....**27**, 195 (1915)
ALCOHOL. *See* Ethyl Alcohol.
ALKALI METALS, Behavior in Flaming Arc.....**31**, 369 (1917)
See also Lithium, Potassium, Sodium.
ALKALINE EARTH METALS, Behavior in Flaming Arc.....**31**, 370 (1917)
Non-ferrous Alloys, Experiences with.....**40**, 15 (1921)
See also Barium, Calcium, Strontium.

ALKALIS, Concentration of Solutions of....**26**, 215 (1914)
See also Potassium Hydroxide, Sodium Hydroxide.
ALKALOIDS, Electrodeposition of Antimony, Effect on....**31**, 297 (1917)
Lead Pating Baths, Effect on....**21**, 318 (1912)
ALLOYS, Aluminum-Copper **40**, 405 (1921)
Aluminum, Effect of Amalgamation upon....**36**, 289 (1919)
Calcium-Barium-Lead, Electrolytically Produced....**40**, 27 (1921)
Cobalt, Copper-Cobalt **21**, 461 (1912)
Corrosion-Resistant **39**, 259 (1921)
Corrosion-Resisting, Principles of....**39**, 253 (1921)
Electrical Conductivity **21**, 21 (1912)
Electrical Production....**37**, 457 (1920)
Electrodeposition, Principles of....**40**, 289 (1921)
Ferro Industry, Recent Developments in....**37**, 265 (1920)
Iron, Corrosion of....**22**, 241 (1912)
Iron-Nickel **30**, 69 (1916)
Iron-Silicon, Acid-Resisting Properties of....**31**, 205 (1917)
Lead-Thallium, Electrolytic Corrosion of....**40**, 51 (1921)
Lead-Tin, Electrodeposition of....**40**, 287 (1921)
Magnetic **32**, 165 (1917)
Magnetic, Preparation of....**32**, 175 (1917)
Manganese and Silicon, Electric Furnace Manufacture, **35**, 401 (1919)
Non-ferrous, Deoxidizing Agents for....**40**, 15 (1921)
Non-Ferrous, Experiences with Alkaline and Alkaline Earth Metals in **40**, 15 (1921)
Non-ferrous, List of Electric Furnaces for....**39**, 293 (1921)
Osmium-Platinum **24**, 391 (1913)
Potassium-Sodium, for Drying Gases....**22**, 156 (1912)
Pyroforic **34**, 187 (1918)
Research Problems in....**37**, 499 (1920)
Silver-Bismuth, Electrolytic Refining of....**22**, 301 (1912)
Thermoelectromotive Force **33**, 183 (1918)
See also Individual Metals.
ALLOYS RESEARCH ASSOCIATION, Proposed....**37**, 505 (1920)
ALOES **26**, 131 (1914)
Barbadoes, Lead Deposition from Lead Formate, Effect on....**26**, 127 (1914)
Lead Deposition from Lead Lactate, Effect on....**26**, 123 (1914)
ALOES EXTRACT, Lead Deposition, Effect on, **26**, 107 (1914); **27**, 131 (1915)
Tin Plating, Effect on....**29**, 411 (1916)
ALOIN, Electrodeposition of Antimony, Effect on....**31**, 295 (1917)
Electrodeposition of Tin, Effect on....**33**, 159 (1918); **38**, 151 (1920)
Tin Plating from Alkaline Bath, Effect on....**38**, 136 (1920)
ALTERNATING CURRENT, Arc Welding with....**39**, 280 (1921)
Superposed upon Direct Current....**29**, 313 (1916)

ALUMINA. *See* Aluminum Oxide.
ALUMINUM, Acids, Rate of Solution in....**38**, 267 (1920)
Boiling Point, Estimated....**34**, 266 (1918)
Bronzes, Properties of....**40**, 428 (1921)
Calorizing Process, Use in....**27**, 253 (1915)
Carbon Arc, Behavior in....**37**, 687 (1920)
Cathode, Rotating, Use as....**21**, 245 (1912)
Chromite, Reduction of, by....**24**, 169 (1913)
Copper Alloys, Manufacture, Properties and Uses, **40**, 405, 430 (1921)
Copper Alloys, Single Potential, Effect of Amalgamation....**36**, 289 (1919)
Copper Alloys, Specific Gravity....**36**, 296 (1919)

AMMONIUM ACETATE, Lead Deposition from Lead Acetate Solutions, Effect on....**26**, 111 (1914)
Nickel, Electrodeposition of, Effect on....**29**, 389 (1916)
Nickel Plating Bath, Effect on **31**, 141 (1916)
AMMONIUM BROMIDE, Nickel, Electrodeposition of, Effect on **29**, 389 (1916)

Ammonium Chloride, Brass, Electrodeposition of, Effect on **38**, 189 (1920)
Compound with Silicon or Titanium Chloride..... **35**, 332 (1919)
Iron, Corrosion of, Effect on..... **21**, 347 (1912)
Nickel, Electrodeposition of, Effect on..... **29**, 389 (1916)
Potential of Positive Electrode of Le Clanché Cell, Effect on..... **27**, 165 (1915)
Ammonium Citrate, Electrodeposition of Nickel, Effect on. **29**, 387 (1916)
Nickel Plating Baths, Effect on..... **30**, 141 (1916)
Ammonium Ethylsulfate, Lead Deposition from Lead Acetate Solutions, Effect on..... **26**, 113 (1914)
Ammonium Fluoborate, Lead Deposition from Lead Acetate Solutions, Effect on..... **26**, 111 (1914)
Ammonium Hydroxide, Brass, Electrodeposition of, Effect on **38**, 191 (1920)
Nickel, Electrodeposition of, Effect on, **25**, 340 (1914); **28**, 339 (1915)
Ammonium Oxalate, Iron, Electrodeposition of, Effect on, **25**, 529 (1914)
Ammonium Perchlorate, Lead Deposition from Lead Acetate Solutions, Effect on..... **24**, 317 (1913); **26**, 99 (1914)
Lead Plating Baths, use in..... **21**, 315 (1912)
Nickel, Electrodeposition of, Effect on..... **29**, 389 (1916)
Ammonium Persulfate, Zinc Amalgam, Corrosion of.... **32**, 264 (1917)
Zinc, Corrosion of, by..... **32**, 264 (1917)
Ammonium Phosphate, Fertilizer, Value as..... **27**, 392 (1915)
Ammonium Stannous Chloride, Tin, Electrodeposition of, from **33**, 157 (1918)
Ammonium Sulfate, Iron, Corrosion of, Effect on **21**, 347 (1912); **25**, 530 (1914)
Ammonium Tartrate, Nickel, Electrodeposition of, Effect on..... **29**, 389 (1916)
Ammonium Uranate, Preparation of..... **35**, 192 (1919)
Amyl Acetate, Electromotive Force of Cell Containing.... **23**, 418 (1913)
Electro. *See* Electroanalysis.
Spectroscopic, of Lead in Copper..... **32**, 335 (1917)
Anchor Chains, Cast Steel, Heat Treating in Electric Furnace **35**, 411 (1919)
Aniline, Electromotive Force of Cell containing..... **23**, 416 (1913)
Electrolytic Production of..... **40**, 130 (1921)
Analysis, Chemical, Arc Images in..... **37**, 665 (1920)
Aniline Acetate, Electromotive Force of Cell containing.. **23**, 412 (1913)
Annealing, Microstructure of Electrolytic Iron, Effect on, **25**, 489 (1914)
Anodes, Aluminum, Film on..... **26**, 145 (1914)
Carbon **27**, 70 (1915)
Carbon, for Electrolysis Copper Sulfate Leach Liquors, **28**, 78 (1915)
Department of Copper Refinery, Inventory in..... **25**, 276 (1914)
Duriron for **31**, 211, 213 (1917)

ANODES, *Continued*
Faraday's Law at....**38**, 91 (1920)
Ferro-Manganese **35**, 375 (1919)
Gold and Silver Precipitation from Cyanide Solutions..**28**, 291 (1915)
Insoluble, for Cyanide Electrolytes....**24**, 252 (1913)
Lead Insoluble, in Precipitation of Copper....**33**, 131 (1918)
Magnetite **27**, 73 (1915)
Magnetite-Copper Oxide **31**, 216 (1917)
Nickel, Corrosion of **30**, 106 (1916)
Rotating, Electroanalysis of Copper and Lead with....**24**, 297 (1913)
Tungsten **31**, 236 (1917)
ANODE EFFECT **30**, 354, 355 (1916)
ANOLYTE, Silver Coulometer, Effect in....**22**, 379 (1912)
ANTENNAE, Radio, Copper-Clad Wire....**28**, 402, 403 (1915)

Plating, Solutions for **23**, 249 (1913)
Potential in Brass Plating Solutions **38**, 175 (1920)
Potential in Various Solutions **36**, 224 (1919)
Refining, Electrolytic, Flow Sheet **25**, 257 (1914)
Refining, Electrolytic, Metal Inventory **25**, 255 (1914)
Refining, Power Problem in **25**, 65 (1914)
Refining with Rotating Cathode **24**, 307 (1913)
Scale, Corrosion of Iron and Steel, Effect on **30**, 379 (1918)
Sherardizing **21**, 567 (1912)
Silicate Ores, Roasting **22**, 299 (1912)
Single Potential of, in Copper Salts **25**, 348 (1914)
Single Potential in Potassium Copper Cyanide **31**, 307 (1917)
Single Potential in Potassium Cyanide Solution..... **31**, 306 (1917)
Single Potential in Potassium Silver Cyanide **28**, 314 (1915)

COPPER, *Continued*
Slimes Tailings, Roasting and Leaching **28**, 57 (1915)
Solution, Chlorine, Removal of **25**, 193 (1914); **27**, 51 (1915)
Solution, Electrolytic **40**, 231 (1921)
Solution, Iron, Removal of **27**, 60 (1915)
Solution, Recovery from **27**, 40 (1915)
Steels **22**, 264 (1912); **39**, 171, 259 (1921)
Sulfate Liquors, Electrolysis of, Using Carbon Anodes.**28**, 73 (1915)
Sulfuric Acid, Corrosion by **32**, 268 (1917)
Tailings, Leaching of **25**, 243 (1914)
Tensile Strength of Deposits **30**, 174 (1916)
Tin Alloy, Electroanalysis **22**, 273 (1912)
Tin Alloys **39**, 210 (1921)
Tin, Separation from, by Electrolysis **22**, 271 (1912)
Titanium Alloy, Electrical Conductivity **37**, 521 (1920)
Zinc Alloy, Corrosion of Iron, Effect on **22**, 262 (1912)
Zinc Alloy, Effect of Lead on **40**, 254 (1921)
COPPER ACETATE, Electrolysis in Presence of Gelatin **22**, 287 (1912)
COPPER CYANIDE, Plating Bath, Efficiency of **33**, 147 (1918)
Plating Bath, Evolution of Hydrogen from **31**, 303 (1917)
Solution, Formation of Poor Conducting Film on Copper Anode in **26**, 63 (1914)
COPPER OXIDE, Fractional Combustion of Gases, Effect on..**32**, 467 (1917)
Magnetite Electrodes, Effect on **31**, 213 (1917)
COPPER PROPIONATE, Electrolysis in Presence of Gelatin....**22**, 287 (1912)
COPPER SALTS, Bunsen Flame, Behavior in **25**, 122 (1914)
Electrical Endosmose **31**, 264 (1917)
Solution of Metals in Acids, Effect on **38**, 268 (1920)
COPPER SULFATE, Copper Pickling Solution, Recovery from.**32**, 231 (1917)
Copper Sulfide Ore, Formation from **22**, 294 (1912)
Corrosion of Steel by Acids, Effect on **39**, 156 (1921)
Electrolysis, Concentration Changes in **23**, 383 (1913)
Iron, Corrosion of, Effect on **21**, 342 (1912)
Liquors, Electrolysis with Carbon Anode **28**, 73 (1915)
Solution, Decomposition Voltage, Effect of Light on...**24**, 331 (1913)
COPPER SULFIDE Concentrates, Sulfatizing Roasting **22**, 293 (1912)
Electrical Conductivity **21**, 54 (1912)
Ores, Sulfatizing Roasting **22**, 293 (1912)
Ores, Treatment of **27**, 46, 168 (1915)
CORES, Drying Oven for **31**, 148 (1917)
CORN SIRUP, Zinc Deposition from Cyanide Solutions, Effect on **40**, 256 (1921)
CORNELIUS FURNACE, Electric Zinc **40**, 253 (1921)
CORONA, Ionization in **31**, 421 (1917)
CORONA DISCHARGE **29**, 600 (1916); **31**, 418 (1917)
CORPORATIONS, Industrial Research in **29**, 35, 36 (1916)

Corrosion, Accelerated Tests **39**, 71 (1921)
Acid Concentration and Speed of **22**, 203 (1912)
Alloys Resisting, Principles of **39**, 253 (1921)
Aluminum-Copper Alloys **40**, 424 (1921)

Molybdenum, Carbon Arc, Behavior in....37, 696 (1920)
Effect of Copper on....25, 390 (1914)
Electrical Resistance at 1,700° 26, 243 (1914)
Electron Emission from 29, 138 (1916)
Molybdenum Carbide, Boiling Point, Estimated 34, 279 (1918)
Molybdenum Ores, Electric Smelting 24, 167 (1913)
Molybdenum Oxide, Boiling Point, Estimated 34, 266 (1918)
Silicon, Reaction with 39, 406 (1921)
Molybdenum Resistance Furnace 26, 241 (1914)
Molybdenum Sulfide, Boiling Point, Estimated 34, 266 (1918)
Monazite Sand, Radium Content 34, 207 (1918)
Monel Metal, Corrosion in Sodium Carbonate, Effect of Current Reversal 29, 486 (1916)
Emissivity 23, 321 (1914)
Heat Loss from, in Quiet Air 23, 314 (1915)
Properties 39, 216 (1921)
Morphine, Electrodeposition of Antimony, Effect on 31, 297 (1917)
Mosher-Ludlow Process for Hydrometallurgy of Copper.25, 208 (1914)
Moscicki Furnace for Nitrogen Fixation 34, 225 (1918)
Motor Batteries, Electrical Characteristics 31, 326 (1917)
"Motor Effect," in Electric Furnace 39, 319 (1921)
Muffle Furnace 26, 230 (1914)
Muntz Metal, Corrosion 39, 228 (1921)
Muscle Shoals 33, 30, 301 (1918)
Naphthalene, Phthalic Acid from, Thermal Problems in..36, 173 (1919)
Naphthol, Electrodeposition of Antimony, Effect on 31, 295 (1917)
Electrodeposition of Zinc, Effect on....25, 291 (1914)
a-Naphthylamine, Aniline and, Electromotive Force of Cell Containing 23, 416 (1918)
Touluidine and, Electromotive Force of Cell Containing 23, 417 (1918)
National Economy, Electrochemistry and 33, 47 (1918)
Natural Gas, Extraction of Helium from....39, 45 (1921)
Hydrocarbons and, Gasoline from, by Electric Discharge 32, 345 (1917)
Naval Consulting Board, Report 35, 6 (1919)
Negative Craters, Carbon Arc 31, 373 (1917)
Neill Process for Hydrometallurgy of Copper 25, 209 (1914)
Nelson, British Columbia, Gold and Silver Precipitation from Cyanide Solutions at 28, 287 (1915)
Nelson Electrolytic Cell for Chlorine 35, 239 (1919)
Neodymium, Carbon Arc, Behavior in 37, 689 (1920)
Neutralization Zone 29, 208 (1916)
New Cornelia Copper Co., Technique of Leaching....27, 46 (1914)
Niagara Falls, Chemical Industries at 29, 73 (1916)
Electric Furnace Products at 29, 66 (1916)
Nitrogen Industry at 29, 79 (1916)

NIAGARA FALLS, *Continued*
Power Development **29**, 59 (1916)
Power and American Industries **29**, 59 (1916)
Power, International Situation **29**, 59, 92 (1916)
Power, Legislation and **31**, 14 (1917)
Utility and Beauty **31**, 23 (1917)
NICHROME-Cobalt Thermocouples **29**, 562 (1916)
Electric Furnace Production **37**, 461 (1920)
Properties **37**, 461, 464 (1920)
Testing of **31**, 395 (1917)
Wire, Oxidation of **26**, 234 (1914)
NICKEL, Alloys, Electric Furnace Production, **37**, 461 (1920); **39**, 302 (1921)
Alloys, Properties **39**, 216 (1921)
Anodes, Behavior in Cyanide Solutions **24**, 252 (1913)
Anodes, in Caustic Solutions **30**, 291 (1916)
Anodes, Passivity of **23**, 122 (1913)
Anodes, Purity of **23**, 121 (1913)
Baths Containing Pure Nickel Salts, Nickel from..... **23**, 282 (1913)
"Black" **23**, 269 (1913)
Brittleness, Sulfur as Cause of **38**, 301 (1920)
Calorizing **27**, 260 (1915)
Carbon Arc, Behavior in **37**, 691 (1920)
Catalyist **36**, 142 (1919)
Cathode, Copper Content **26**, 59 (1914)
Chromium Alloy, Corrosion in Sodium Carbonate Solution, Effect of Current Reversal on..... **29**, 486 (1916)
Chromium Alloys, Properties **37**, 461 (1920)
Chromium Alloys, Thermoelectromotive Force..... **33**, 186 (1918)
Cobalt Alloy, Electrodeposition **23**, 109 (1913)
Cobalt, Electrolytic Separation of..**23**, 113 (1913); **27**, 30, 32 (1915)
Copper and, Alternate Electrodeposition **40**, 307 (1921)
Copper-Chromium Alloys, Electrical Resistance..... **29**, 569 (1916)
Copper-Manganese Alloys, Electrical Resistance **29**, 569 (1916)
Effect on Corrosion of Iron **39**, 173 (1921)
Electric Furnace, Bibliography **38**, 445 (1920)
Electrodeposited, on Brass **23**, 291 (1913)
Electrodeposited, on Grey Iron **23**, 291 (1913)
Electrodeposited, on Iron, Porosity of **30**, 152 (1916)
Electrodeposited, on Zinc, Porosity of **30**, 154 (1916)
Electrodeposited, Physical Properties **39**, 472, 489 (1921)
Electrodeposited, Structure of **36**, 213 (1913)
Electrodeposited with Copper **26**, 61 (1914)
Electrodeposition of, **23**, 116 (1913); **28**, 339 (1915); **30**, 103 (1916); **39**, 483 (1921)
Electrodeposition from Concentrated Solutions..... **27**, 120 (1915)
Electrodeposition from Fluoride Solutions **39**, 459 (1921)

NICKEL, *Continued*
Electrodeposition, Minimum Potential for **39**, 453 (1921)
Electrodeposition on Steel Tools **35**, 273 (1919)
Electrodeposition from Nickel Ammonium Sulfate.....**25**, 335 (1914)
Electrodes, Electrolysis of Caustic Solutions with.....**30**, 292 (1916)
Electrolytic, Carbon Deposition with.....**26**, 79 (1914)
Electrolytic Determination,
23, 149 (1913); **26**, 79 (1914); **31**, 270 (1917)
Electrolytic, Ductile **39**, 483 (1921)
Electrolytic, Melting of.....**23**, 276 (1913)
Electrolytic Refining **35**, 259 (1919)
Gold Alloy **23**, 276 (1913)
Hydrogen Content of Deposited.....**39**, 491 (1921)
Iron Cobalt Thermocouple.....**29**, 566 (1916)
Iron, Corrosion of, Effect on.....**22**, 246 (1912)
Malleable **23**, 144 (1913)
Manganese Alloys, Thermoelectromotive Force.....**33**, 191 (1918)
Overvoltage at Varying Pressures.....**40**, 178 (1921)
Plating **23**, 286 (1913)
Plating Baths **23**, 123 (1913); **39**, 459 (1921)
Plating Baths, Volume of, and Current Efficiency.....**30**, 142 (1916)
Plating, Black, Military Applications.....**34**, 172 (1918)
Plating of Zinc.....**30**, 113 (1916)
Plating, Rapid **29**, 395 (1916)
Plating, Rotating Cathodes, Current Efficiency in.....**30**, 135 (1916)
Plating, Sodium Alizarin Sulfonate as Indicator in....**29**, 378 (1916)
Plating Solutions, Analysis of.....**39**, 463 (1921)
Plating Solutions, Hydrogen Ion Concentration of.....**39**, 466 (1921)
Plating Solutions, Resistivity of.....**39**, 476 (1921)
Plating upon Tin.....**31**, 283 (1917)
Plating with **29**, 383 (1916)
Resistors, Deterioration of.....**38**, 301 (1920)
Separation by Double Nitrite Method.....**27**, 31 (1915)
Sherardizing **21**, 567 (1912)
Silver, Melting in Electric Furnace.....**40**, 399 (1921)
Solutions, Vanadium Chloride in.....**30**, 227 (1916)
Steel, Corrosion in Sodium Carbonate Solution, Effect of Current Reversal on.....**29**, 486 (1916)
Steel, Hydrogen-Annealed **34**, 329 (1918)
Steel, Hydrogen, Penetration of.....**36**, 124 (1919)
Steel, Plating of.....**35**, 273 (1919)
Steel. *See also* Climax Alloy, Invar Alloy, Mangaloy.
Sulfur, Effect of.....**38**, 301 (1920)

Electrolytic, of Iron and Steel **32**, 237 (1917)
Hydrochloric Acid, Effect on Carbon Steel **37**, 567 (1920)
Hydrofluoric Acid, Effect on Carbon Steel **37**, 566 (1920)

PICKLING, *Continued*
Iron, Effect of Lead Plating on **35**, 397 (1919)
Nitric Acid, Effect on Carbon Steel **37**, 567 (1920)
Sodium Acid Sulfate, Effect on Carbon Steel.....**37**, 566 (1920)
Steel, After Treatment, Effect of.....**37**, 568 (1920)
Steel, Electrolytic **31**, 181 (1917)
Sulfuric Acid, of Carbon Steel, Effect on Brittleness..**37**, 562 (1920)
PICRIC ACID, Corrosion of Lead Amalgam by Sodium Hydroxide, Effect on **32**, 276 (1917)
Corrosion of Lead by Sodium Hydroxide, Effect on....**32**, 276 (1917)
Corrosion of Tin Amalgam by Sodium Hydroxide, Effect on **32**, 276 (1917)
Corrosion of Tin by Sodium Hydroxide, Effect on....**32**, 276 (1917)
Corrosion of Zinc Amalgam by Sodium Hydroxide, Effect on **32**, 276 (1917)
Corrosion of Zinc by Sodium Hydroxide, Effect on ...**32**, 276 (1917)
PIG IRON. *See* Iron.
PINCH EFFECT **26**, 252 (1914)
PIN HOLES in Electrodeposited Metals, Test for **30**, 153 (1916)
In Nickel Plate **30**, 156 (1916)
In Tin Plate **30**, 158 (1916)
PINENEEDLE OIL, Metals Adsorption by **31**, 278 (1917)
PINE WOOD EXTRACT, Effect on Lead Deposition **26**, 104 (1914)
PIPE, Embrittling Effect of Pickling of **37**, 497 (1920)
PITCHBLENDE, Uranium, Extraction of **35**, 191 (1919)
PITTING, Corrosion, Role in **29**, 462 (1916)
See also Corrosion.
"PITTING FACTOR" **22**, 223, 237 (1912)
PLANE SURFACES, Heat, Convection of, from **23**, 304 (1913)
PLANT GROWTH, Stimulation of, by Electrical Means.....**28**, 135 (1915)
PLATES, RECTANGULAR, Heat Flow Through **24**, 66 (1913)
PLATING BATHS, Addition Agents, Essential Oils as.....**31**, 271 (1917)
Zinc Cyanide **40**, 257 (1921)
See also names of the various metals.
PLATING ROOMS, Lighting of **27**, 474 (1915)
PLATINIC CHLORIDE, Corrosion of Iron, Effect on **21**, 348 (1912)
PLATINUM, American, Quality of **30**, 81, 90 (1916)
Ammonia Oxidation, Catalyzer for **35**, 283 (1919)
Boiling Point, Estimated **34**, 279 (1918)
Carbon Arc, Behavior in **37**, 694 (1920)
Catalytic Action, Poisoning of **32**, 439 (1917)
Electrical Conductivity at Various Temperatures.....**21**, 57 (1912)
Electrode, Potentials **25**, 439 (1914)
Fractional Combustion of Gases, Effect on **32**, 466 (1917)
Hydrochloric Acid, Corrosion by **32**, 269 (1917)
Occlusion of Gases and Electrical Resistance **34**, 177 (1918)

PLATINUM, *Continued*
Poisons **35**, 306 (1919)
Solution of Metals in Acids, Effect on **38**, 262 (1920)
Substitute **34**, 329 (1918)
Volatilization of **35**, 304 (1919)
POISONOUS GASES, Chlorine in Manufacture of **34**, 158 (1918)
POLARIZATION, Alternating Current, Effect of **37**, 625 (1920)
Dry Cells and Hydrogen Ion Concentration **37**, 614 (1920)
Electrodes of Unequal Size **25**, 422 (1914)
Le Clanché Cells **27**, 155 (1915); **29**, 315 (1916)
Limits of Term **27**, 170 (1915)
Nickel Plating Solution **30**, 108 (1916)
Single Potentials **25**, 415 (1914)
POPLAR WOOD EXTRACT, Lead Deposition, Effect on.... **26**, 101, 121 (1914)
"POPLOX," Thermal Resistivity **21**, 551 (1912)
PORCELAIN, Electrical Resistivity at High Temperatures... **33**, 205 (1918)
Insulators **28**, 401 (1915)
Manufacture in America **30**, 77, 85 (1916)
POROSITY, Ferroxyl Test **30**, 151 (1916)
Tests for **30**, 151 (1916)
POTASH, Blast Furnace Dust, Recovery from, by Electrical Precipitation **35**, 207 (1919)
Bulb for Carbon Dioxide Absorption **37**, 249 (1920)
Cement Dust, Recovery from, by Electrical Precipitation **35**, 204 (1919)
POTASSIUM, Carbon Arc, Behavior in **37**, 683 (1920)
Electrical Conductivity **25**, 379 (1914)
Physical Properties **25**, 388 (1914)
Sodium Alloy for Drying Gases **22**, 156 (1912)
POTASSIUM ACETATE, Electrodeposition of Nickel, Effect on. **29**, 389 (1916)
POTASSIUM ACID FLUORIDE, Electrolysis... **35**, 341 (1919); **36**, 208 (1919)
Fluorine from **36**, 208 (1919)
POTASSIUM ACID SULFATE, Electrolysis **38**, 214 (1920)
POTASSIUM BITARTRATE, Electrodeposition of Silver, Effect on **29**, 421 (1916)
POTASSIUM BROMIDE, Boiling Point, Estimated **34**, 268 (1918)
Bromine Solutions Density **30**, 314 (1916)
Bromine Solutions, Electrical Conductivity **30**, 314 (1916)
Bromine and, Equilibrium at 0° C..... **30**, 295 (1916)
Conductivity of Solutions **30**, 311 (1916)
Corrosion of Iron, Effect on **21**, 347 (1912)
POTASSIUM CARBONATE, *See* Potash.
POTASSIUM CHLORATE, Corrosion of Iron, Effect on..... **21**, 345 (1912)
Electrodeposition of Lead, Effect on **26**, 111 (1914)
POTASSIUM CHLORIDE, Boiling Point, Estimated **34**, 264 (1918)
Electrodeposition of Nickel, Effect on **29**, 389 (1916)
Electrode Potential of Silver, Effect on **28**, 319 (1915)

Potassium Chromate, Corrosion of Iron, Effect on.....**21**, 343 (1912)
Potassium Citrate, Electrodeposition of Nickel, Effect on.**29**, 389 (1916)
Potassium Cyanide, Analysis **28**, 309 (1915)
Aqueous Solutions, Electrolysis of **24**, 271 (1913)
Boiling Point, Estimated **34**, 268 (1918)
Loss During Electrolysis of Cyanide Solutions...**24**, 256, 279 (1913)
Silver Electrode Potential, Effect on **28**, 319 (1915)
Tin, Electrodeposition of, Effect on **29**, 407 (1916)
Potassium Dichromate, Corrosion of Copper by Acids, Effect on **32**, 268 (1917)
Corrosion of Iron, Effect on **21**, 348 (1912)
Corrosion of Iron and Steel, Effect on **39**, 88 (1921)
Corrosion of Tin by Acids, Effect on **32**, 268 (1917)
Corrosion of Zinc Amalgam by Acids, Effect on.....**32**, 263 (1917)
Potassium Fluoride, Boiling Point, Estimated **34**, 268 (1918)
Corrosion of Iron, Effect on **21**, 348 (1912)
Potassium Hydroxide, Silver Electrode Potential, Effect on, **28**, 319 (1915)
Potassium Iodide, Boiling Point, Estimated **34**, 268 (1918)
Diffusion Rate **21**, 211 (1912)
Iron, Corrosion of, Effect on **21**, 348 (1912)
Potassium Nitrate, Electrical Conductivity and Fluidity of **21**, 99, 109 (1912)
Iron, Corrosion of, Effect on **21**, 344, 349 (1912)
Lead, Corrosion of, Effect on **32**, 275 (1917)
Nickel Plating Baths, Effect on **30**, 140 (1916)
Sodium Nitrate Mixture, Electrical Conductivity.....**21**, 111 (1912)
Tin, Corrosion of, Effect on **32**, 275 (1917)
Zinc, Corrosion of, Effect on.....**32**, 275 (1917)
Potassium Perchlorate, Electrodeposition of Lead, Effect on **26**, 111 (1914)
Potassium Permanganate, Corrosion of Copper by Acids, Effect on **32**, 268 (1917)
Corrosion of Lead by Alkalies, Effect on.....**32**, 275 (1917)
Corrosion of Tin by Acids, Effect on **32**, 268 (1917)
Corrosion of Tin by Alkalies, Effect on.....**32**, 275 (1917)
Corrosion of Zinc by Alkalies, Effect on **32**, 275 (1917)
Potassium Persulfate, Hydrogen Peroxide from.....**38**, 216 (1920)
Preparation, Electrolytic **38**, 211 (1920)
Zinc Amalgam, Corrosion of, Effect on **32**, 264 (1917)
Zinc, Corrosion of, Effect on **32**, 264 (1917)
Potassium Silver Cyanide, Preparation **28**, 312 (1915)
Potassium Stannite, Electrodeposition of Tin from **29**, 407 (1916)
Potassium Sulfate, Hydrogen Penetration in Iron, Effect on **36**, 121 (1919)
Iron, Corrosion of, Effect on **21**, 347 (1912)
Potassium Sulfide, Boiling Point, Estimated **34**, 266 (1918)

Potassium Sulfocyanide, Boiling Point, Estimated **34**, 268 (1918)
Potassium Tartrate, Electrodeposition of Nickel, Effect on.**29**, 389 (1916)
Potential, Sign of,
31, 250, 252 (1917); **32**, 426 (1917); **34**, 189 (1918); **36**, 3 (1919)

Decomposition Temperature **21**, 438 (1912)
Furnace, Temperature Measurements in **21**, 425 (1912)
Formation Temperature **21**, 438 (1912)
Silicon Oxycarbide, Preparation and Properties....**27**, 267, 276 (1915)
Silicon Tetrachloride, Manufacture **35**, 311 (1919)
Organic Syntheses, Condensing Agent in....**35**, 318 (1919)
Physical Properties **35**, 309 (1919)
Smoke Producing Power **35**, 326 (1919)
Vapor at Reduced Pressure, Electric Arc in....**29**, 618 (1916)
War Uses **35**, 317, 323 (1919)
Sil-O-Cel, Forms of **28**, 255, 259 (1915)
Insulating Properties **28**, 252 (1915)
Siloxicon, Preparation in Electric Furnace....**22**, 73 (1912)
Silver, Acetic Acid, Corrosion by **32**, 268 (1917)
Alloys, Electrodeposition of **23**, 94 (1913)
"Atomic Weight," Preparation of....**22**, 372 (1912)
Bismuth, Separation of, by Electrolysis....**22**, 301 (1912)
Carbon Arc, Behavior in **37**, 680 (1920)
Cathode Loss in Refining Copper **26**, 54 (1914)
Coulometer **22**, 367, 398 (1912)
Coulometer, Iodine Coulometer, Comparison with....**22**, 426 (1912)
Deposits, Heavy **35**, 281 (1919)
Electric Furnace for **39**, 304 (1921)
Electric Furnace Melting **39**, 351 (1921); **40**, 389 (1921)
Electrochemical Equivalent **22**, 345, 432 (1912)
Electrodeposition, Addition Agents in **29**, 417 (1916)
Electrodeposition from Solutions Containing Carbon Bisulfide **38**, 131 (1920)
Electrodeposition from Unusual Salts, Addition Agents in **31**, 285 (1917)
Electrodeposition, Summary **23**, 25 (1913)
Electrolytic, Inclusions in **22**, 345 (1912)
Electrolytic Precipitation from Cyanide Solutions, **24**, 265 (1913); **28**, 263 (1915)
Electrolytic Refining **35**, 251 (1919)
Essential Oils, Adsorption of....**31**, 278 (1917)
Furnace Fumes, Electrical Precipitation **28**, 119 (1915)

SILVER, *Continued*
Heat Losses from, in Quiet Air **23**, 314 (1913)
Iron, Corrosion of, Effect on.....**22**, 247 (1912)
Metallic, Preparation of **22**, 372 (1912)
Ores, Electric Smelting **24**, 139 (1913)
Ores, Electrocyanide Processes, Review.....**24**, 241, 271 (1913)
Ores, Electrostatic Separation **24**, 354 (1913)
Plating Baths, Specific Conductivity **28**, 314 (1915)
Plating, Burnishing of **31**, 283 (1917)
Pouring Temperatures **40**, 390 (1921)
Refinery, Inventory in **25**, 270 (1914)
Single Potential in Potassium Cyanide Solution.....**31**, 306 (1917)
Single Potential in Potassium Silver Cyanide Solution, **28**, 314 (1915); **31**, 307 (1917)
Sulfuric Acid, Corrosion by **32**, 268 (1917)
Valence of **32**, 391 (1917)
Volatility of **28**, 137 (1915)
Voltameter **29**, 431 (1916)
SILVER CARBONATE, Corrosion of Steel by Acids, Effect on.**39**, 157 (1921)
SILVER CYANIDE Plating Solution, Evolution of Hydrogen from **31**, 303 (1917)
Single Potential, Effect of Composition and Concentration **28**, 307 (1915)
SILVER ETHYLSULFATE, Silver Deposition from **31**, 285 (1917)
SILVER FLUORIDE, Silver Deposition from **31**, 285 (1917)
SILVER FLUOSILICATE, Silver Deposition from **31**, 285 (1917)
SILVER NITRATE, Conductivity and Fluidity of Solutions of..**21**, 110 (1912)
Electrolysis in Acid Solution **32**, 396 (1916)
Iron, Corrosion of, Effect on **21**, 342 (1912)
Silver Deposition from, Addition Agents in **29**, 417 (1916)
Silver, Electrolytic, Content of **22**, 362 (1912)
Silver Peroxynitrate from **30**, 332 (1916)
SILVER OXIDE, Silicon, Reaction with.....**39**, 410 (1921)
SILVER PERCHLORATE, Silver Deposition, from.....**31**, 285 (1917)
SILVER PEROXIDE, Composition **32**, 391 (1917)
Lead, Reaction of **32**, 396 (1917)
Manganese, Reaction with **32**, 396 (1917)
SILVER PEROXYNITRATE, Preparation and Composition **30**, 327 (1916)
SILVER SALTS, Silver Deposition from, Review.....**23**, 62 (1913)
Solution of Metals in Acids, Effect on **38**, 267 (1920)
SILVER SULFATE, Corrosion of Iron, Effect on.....**21**, 348 (1912)
SILVER SULFIDE, Electrical Properties.....**25**, 393 (1914)
Electrical Resistance **25**, 395 (1914)
Temperature-Resistance Curve **25**, 398 (1914)
Thermoelectric Effects **25**, 403 (1914)

SINGLE POTENTIAL, Aluminum Copper Alloys, Effect of Amalgamation **36**, 289 (1919)
Aluminum-Nickel Alloys, Effect of Amalgamation.... **36**, 312 (1919)
Aluminum-Zinc Alloys, Effect of Amalgamation..... **36**, 303 (1919)

Tin Alloy as Deoxidizing Agent for Copper Castings..**40**, 16 (1921)
Sodium Acetate, Electrodeposition of Nickel, Effect on....**29**, 389 (1916)
Sodium Acid Cyanamide, Electrolytic Dissociation....**40**, 135 (1921)
Sodium Acid Sulfate, Electrodeposition of Brass, Effect on, **38**, 196 (1920)
Electrolysis **38**, 217 (1920)
Pickling of Carbon Steel....**37**, 566 (1920)
Sodium Alizarin Sulfonate, Use as Indicator in Nickel Plating **29**, 378 (1916)
Sodium Arsenate, Corrosion of Iron by Acids, Effect on, **32**, 261 (1917)
Corrosion of Iron by Sulfuric Acid, Effect on....**21**, 341 (1912)
Corrosion of Lead by Acetic Acid, Effect on....**32**, 267 (1917)
Corrosion of Lead by Sodium Hydroxide, Effect on,...**32**, 275 (1917)
Corrosion of Tin by Sodium Hydroxide, Effect on....**32**, 275 (1917).
Corrosion of Zinc by Sodium Hydroxide, Effect on....**32**, 275 (1917)
Sodium Arsenite, Lead Plating Baths, Use in....**21**, 315 (1912)
Sodium Benzoate, Zinc Deposition, Effect on....**40**, 266 (1921)
Sodium Bisulfite, Electrodeposition of Brass, Effect on...**38**, 188 (1920)
Sodium Bromide, Boiling Point, Estimated....**34**, 268 (1918)
Sodium Carbonate, Brass, Electrodeposition of, Effect on, **38**, 193 (1920)
Copper Cyanide Plating Baths, Effect on....**33**, 147 (1918)
Corrosion of Metals in Soils, Effect on....**29**, 471 (1916)
Sodium Chlorate, Corrosion of Copper by Acids, Effect on, **32**, 268 (1917)
Corrosion of Lead by Sodium Hydroxide, Effect on...**32**, 275 (1917)
Corrosion of Tin by Acids, Effect on....**32**, 268 (1917)
Corrosion of Zinc Amalgam by Acid, Effect on....**32**, 263 (1917)
Corrosion of Zinc by Sodium Hydroxide, Effect on....**32**, 275 (1917)
Hydrogen Peroxide, Action of....**29**, 339 (1916)
Oxidation with Ozone **29**, 335 (1916)
Oxidation with Sodium Persulfate....**29**, 332 (1916)
Sodium Chloride, Adsorption by *B. pyocyaneus*....**37**, 159 (1920)
Boiling Point, Estimated **34**, 264 (1918)
Electrodeposition of Nickel, Effect on....**29**, 386, 399 (1916)
Steels, Copper, Corrosion by....**22**, 180 (1912)
Sodium Chromate, Silicon, Reaction with....**39**, 397 (1921)
Sodium Citrate, Electrodeposition of Nickel, Effect on....**29**, 389 (1916)
Nickel Deposition on Zinc, Role in....**30**, 119 (1916)

Sodium Cyanide, Copper Cyanide Plating Bath, Effect on..**33**, 147 (1918)
Cyanamide, Preparation from.....**37**, 653 (1920)
Electrodeposition of Brass, Effect on.....**38**, 185 (1920)
Sodium Fluoride, Boiling Point, Estimated.....**34**, 268 (1918)
Zinc Deposition from Cyanide Solution, Effect on.....**40**, 266 (1921)
Sodium Fluosilicate, Lead Deposition from Lead Acetate, Effect on **26**, 113 (1914)
Sodium Hydroxide, Concentration of Solutions of.....**26**, 215 (1914)
Copper Cyanide Plating Baths, Effect on.....**33**, 147 (1918)
Hydrogen Penetration in Iron, Effect on.....**36**, 122 (1919)
Lead, Corrosion of, by.....**32**, 275 (1917)
Marsh Cell for.....**39**, 507 (1921)
Nelson Cell for.....**35**, 240 (1919)
Tariff Problems **34**, 81 (1918)
